

UniPrint Partners with Healthcare IT Management Specialist, Gordian Dynamics, to Provide Secure Pull Printing Solutions

Partnership allows mobile workers secure printing on demand, with print data security and confidentiality ensured

Toronto, Canada, 23 April, 2014 – [UniPrint](#), the world leader in printing virtualization, today announced a partnership agreement with Gordian Dynamics, trusted leaders in the provision of healthcare enabling IT solutions across the Southwest U.S. In this partnership, Gordian Dynamics has incorporated UniPrint's patented universal print technology into their new single sign-on, roaming access solution, DynamicPass. Empowered by UniPrint, DynamicPass provides mobile workers with a virtual roaming desktop, and secure 'tap and print' from any application, on any device to any printer. This secure, new solution brings enterprise mobility to a new level, especially for the healthcare, finance and legal sectors.

Arron Fu, VP of Software Development, UniPrint comments, "With the introduction of DynamicPass' single sign-on secure access, Gordian Dynamics has optimized enterprise workflow and productivity. A user's desktop can now go wherever it's needed, without the need to manually sign in at every desktop as the user roams around the workplace. An essential part of that workflow optimization is enabling secure print to the right printer. UniPrint is the only manufacturer who can provide the mobility and security to print documents with a proven track record both in the healthcare and finance markets."

Traditionally, printing documents has been an issue for even the most efficient hospitals. Frequently practitioners may print to the wrong printer; critical and confidential client documents may be exposed or misplaced; and for legacy reasons, sometimes certain computers can only access certain printers.

DynamicPass featuring UniPrint's universal printer driver, specifically overcomes in-clinic print issues offering secure pull printing. Instead of doctors scrambling to figure out which printers are enabled or where their confidential documents may end up, they simply tap their hospital ID to securely print the correct documents to the nearest printer. UniPrint's tap and print enables:

- Anywhere, anytime, any device, secure pull printing;

- Easy and reliable remote printing across platforms;
- Highly scalable solutions as printers and users are added;
- Printer-vendor independency;
- Simple installation and easy integration;
- Increased operational efficiency and improved productivity enterprise wide.

"UniPrint is a natural partner to provide the secure printing workflow within DynamicPass. It is the leading solution for secure virtual printing and we are dealing with confidential patient/client records, so we needed a trusted, proven solution to partner alongside," said Jeremy Ognall, CEO, Gordian Dynamics. "Printing is often an overlooked function in enterprise design and UniPrint is a natural fit to mitigate that oversight."

The solution will be introduced at the upcoming Citrix Synergy Conference (www.citrixsynergy.com) in Los Angeles, May 6th-8th. Come by the UniPrint Booth # 419 to view a product demo. Alternatively, visit www.uniprint.net to learn more about UniPrint, or download a free product trial.

UniPrint pioneered the use of [PDF-based universal printer driver](#) technology to streamline and enhance secure printing. The patented and award-winning [UniPrint Suite](#) provides a comprehensive range of enhanced-printing solutions for all computing environments. Using UniPrint, millions of workers in over 70 countries enjoy efficient and seamless printing. UniPrint is proud to be able to help customers in large and small, public and private sector organizations to increase productivity and reduce costs.

About UniPrint:

UniPrint, a division of ACCEO Solutions Inc. (www.acceo.com), is the recognized leader in printing virtualization. The newest solution in UniPrint's patented, award-winning product line, UniPrint Infinity is the industry's first truly secure enterprise-wide solution for any computing environment. Enabling anywhere, anytime, any device secure pull printing, UniPrint Infinity comes with a proven ROI through its statistics module, print document archiving functionality and Virtual Print Queue technology. UniPrint Infinity replaces all manufacturer printer drivers with a single PDF generator to promote faster, more efficient printing, helping organizations to improve both productivity and return on investments.
